REASONS FOR ALLOWANCE

Election/Restrictions

1. Claims -3 and 6-81 allowable. The restriction requirement has been reconsidered in view of the allowability of claims to the elected invention pursuant to MPEP § 821.04(a). **The restriction requirement is hereby withdrawn.** Claims 4, 5 and 8-13 and 17-18 are no longer withdrawn from consideration. In view of the above noted withdrawal of the restriction requirement, applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Reasons For Allowance

2. The following is an examiner's statement of reasons for allowance: The prior art of record does not fairly suggest a **reaction product** resulting from an unsaturated vegetable oil that has been modified by the addition of an enophile or dienophile having an acid, ester or anhydride functionality; and a functional vinyl monomer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Prior Art

Newly cited patent to Schmucker-Castner et al, US Patent No. 6,635,702 is cited as providing technological background information. The reference suggests the various components recited in applicant's claims but does not teach a ***reaction product*** resulting from an unsaturated vegetable oil that has been modified by the addition of an enophile or dienophile having an acid, ester or anhydride functionality; and a functional vinyl monomer.
